Great science should be talked about all over the world.

And the scientists behind it deserve to stand out from the crowd.

That's why we made our flagship journal diamond open access, and cover all publishing costs ourselves. Novel ideas, challenging questions and progressive thinking in all areas of chemistry deserve to be seen by everyone who can act on them. Readers should have immediate access to discoveries that can change everyday life around the world for the better.

We help scientists at every stage of their career to make an impact with their work. And we give valuable breakthroughs a voice that lasts.

Editor-in-Chief

Andrew Cooper University of Liverpool, UK

Impact factor 2020: 9.825, median time to first decision (peer reviewed articles only): 30 days.
